Greetings from Patons®

Christa, Marketing

"I started working for Patons six months ago. On my second day on the job, one of our designers sat me down and taught me how to knit. It was a struggle at first but I was soon addicted. Since I learned to knit right before the holidays, this year all my family and friends received hand made gifts. I have now made numerous scarves, a few hats and I'm in the process of finishing my first sweater.

I was recently going through the new Patons Next Steps Six book and saw the beautiful cabled scarf. After reading the instructions it didn't seem that hard, so I'm thinking my next project will be that cabled scarf. I think I'm now ready to move onto the next step!"
